ORANGE WRITERS NETWORK ESTABLISHED

Cara Dolan '89 is the creative imagination behind the Orange Writers Network (OWN), which was established as a way to help open doors for SU alumni trying to break into the entertainment field as writers or other industry professionals. Dolan, a Newhouse graduate, moved to Los Angeles to become a writer. After a few years she realized that most of the SU grads who relocate to Southern California do so to work in the entertainment industry, yet there was no organized way for them to learn from more experienced industry professionals. "Dick Clark, Suzanne de Passe, and Aaron Sorkin are among the many SU grads who've achieved success," Dolan says. "I thought there should be a way for the rest of us to tap into that influential network."

OWN, a standing committee of the Alumni Club of Southern California, set up a "three-act" process by which SU alumni could submit scripts to be read by alumni already established in the entertainment industry. In Act I, two alumni volunteers evaluate a script, provide constructive notes, and either "pass," or refer it on to Act II. At this stage the script is read again by an appropriate volunteer—agent, working writer, producer, etc.—then sent to other interested colleagues. If the script survives this round of scrutiny, it's moved up to Act III to be reviewed by one of an elite group of alumni volunteers who are in a position to

buy or option the script or hire the

writer. Alumni volunteers include such professional writers as Rob Edwards (*Fresh Prince of Bel-Air*), Irma Kalish (*Facts of Life*), Matthew Berry (*Married With Children*), and John Beck (*The Hughleys*). "OWN also has more than 50 committed alumni volunteers representing major studios, talent agencies, and independent production

companies," Dolan says.

OWN began accepting submissions in July and received five scripts within the first two weeks. "I never dreamed OWN would enjoy so much success so soon," Dolan says.

If you're an SU alumnus living in Southern California and want to become involved in OWN as a member or volunteer, leave a message on the hotline at 310-358-6947, or send an e-mail to Su_own@hotmail.com.

STEPPING INTO CYBERSPACE

Syracuse University's Office of Alumni Relations has taken a big step into cyberspace. In the Spring 2000 issue of *Syracuse University Magazine*, we announced the launching of a new online community. This community provides you, our alumni, with access to a password-protected alumni directory, as well as an e-mail forwarding service. Alumni response to this new service has been outstanding. Thousands of you are finding old friends and staying in touch through the online community. If you have not yet joined the community, I encourage you to do so. There's no charge, and it's a great way to stay connected to your friends from college days.

Now we're stepping even further into cyberspace by launching an SU portal for alumni. This portal can be your SU-themed doorway to the Internet. You can personalize your opening page with local weather and stock quotes, and enjoy easy access to campus news, and links to SU sites in the alumni community.

Though communication with more than 200,000 alumni around the world can be difficult, it's key to maintaining a long-term, healthy relationship between alumni and SU.

ALUMNI JOIN RECRUITING EFFORTS

Under the council concept of the Alumni Association, many of SU's regional alumni clubs focus on student recruitment as a main activity. Alumni clubs in Western New York and Houston, for example, make this their primary focus, working through the admissions office with the Alumni Representative Program. They attend many college fairs during the course of the year, sharing information about Syracuse University with prospective students and their parents. They also assist with student interviews when admissions staff members visit these areas.

Currently, the Office of Alumni Relations is working with the admissions office to identify areas across the country where alumni clubs could help with recruiting. Arizona, Florida, and Illinois are three target areas, but all of the clubs are encour-

aged to look at the Alumni Representative Program. The goal is for clubs to assist with student recruitment and also give something back to the University. Admissions office staff work with interested club members to familiarize them with the kinds of questions prospective students and parents ask, as well as general information about the University.

The busiest time of year for alumni representatives is fall, when high school seniors are in the midst of college searches. But college fairs are also held in the spring for high school juniors who are beginning the college search process.

TORNA A SURRIENTO

Looking out across the Bay of Naples to the lovely old town of Sorrento, Jerry Estes '51, G'70 vowed one day to return. Estes made that promise in 1944 from the deck of a U.S. Navy destroyer. More than half a century later, he returned to Sorrento with his wife, June Krause Estes '94, to celebrate their 50th wedding anniversary. "I wanted to show Junie the Isle of Capri," says Estes. "It's by far the most beautiful island in the Mediterranean."

Last summer the couple attended Alumni College in Sorrento, located in Italy's sun-drenched province of Campania. Daily excursions throughout the southern region of Italy and informative educational programs led by SU history professor Kenneth Pennington were part of the nine-day trip sponsored by the Syracuse University Alumni Association. "Each day had a different educational focus," says Jerry Estes. "Before heading to the excavated city of Pompeii, we discussed the volcanic destruction of the city in 79 A.D. and knew just what to look for as we walked through the ancient ruins."

Other highlights included a walking tour of Sorrento with its romantic cafes and lush lemon groves, a visit to the world-renowned Archeological Museum in Naples, a tour of the lavish 18th-century Royal Palace of Caserta, and a drive along the spectacular Amalfi coast. Scanning the coastal cliffs of Positano, the Estes family marveled at the colorful villas clinging to steep slopes with clusters of bougainvillea cas-

cading down to the sea. "The bougainvillea blossoms are bright pink and magenta, and the sea is a deep shade of crystal-clear blue," says June Estes. "I can see why this magnificent coastline has inspired poets and playwrights for centuries."

The Estes family agree their wedding anniversary trip to Sorrento was first class all the way. And even though it took more than five decades to return, Jerry Estes says he's glad he followed the call of that old familiar song, 'Come Back to Sorrento.' "Or as they say in southern Italy," adds June, "Torna a Surriento."

FLORENCE PROGRAM CELEBRATES 40TH ANNIVERSARY

Great art, good friends, and Italian cuisine took center stage at the 40th anniversary celebration of the Florence program sponsored by the Division of International Programs Abroad (DIPA). The festivities, held last spring at the Villa Rossa in Florence, Italy, reunited former students, faculty, program directors, and host families in a four-day event that culminated a nine-month series of anniversary celebrations held in Syracuse, New York City, and San Francisco. Thirty-five Florence alumni shared four decades of memories, enjoyed gourmet picnics in the courtyard garden, took part in tours and lectures on art and architecture, and visited local art studios as part of the reunion activities.

Locating Florence alumni after so many years was a daunting task for DIPA staff. "We searched the Internet, used old student records to contact parents, and relied on good-old-fashioned word of mouth to find as many former students as possible," says Sue Shane, assistant to the director of DIPA. "After months of work, we had updated more than 1,800 addresses of former Florence participants."

Anniversary celebrations for other DIPA sites are now in the planning stages, including the 25th anniversary of the London program in 2003. If you would like to help organize events; search for friends, faculty, and host families; or simply add your name to the mailing list, contact SueEllen Wilson-Gorman by telephone at 315-443-9416, via e-mail at suwilson@syr.edu, or visit the DIPA web site at <http://sumweb.syr.edu/dipa/alumni>.

Third in a Series

Nearly 5,000 graduates of the College of Nursing are members of the Syracuse University Nursing Alumni Association (SUNAA). As association president Jan Pedersen G'91 sees it,

each and every graduate has an obligation to spread the word about career opportunities in professional nursing. "There are so many enticing career choices today," says Pedersen, director of professional and graduate admissions for the College of Nursing. "Young people may not even entertain

JOIN YOUR LOCAL ALUMNI CLUB!

We encourage you to get involved with your local alumni club. By being involved, alumni have the chance to share their school spirit and their pride in Syracuse University. Our clubs participate in a variety of activities, including game-watching events, networking opportunities, new student recruiting, and community service projects.

Please check the Office of Alumni Relations web site at:

duct research, manage companies, and act as health care consultants. The problem, says Pedersen, is that many young people don't choose nursing as a career because they don't know or understand all of the things nurses do. As a result, the nation now faces a critical nursing shortage. "We've encountered nursing shortages in the past," Pedersen says. "This time seems particularly dangerous, as the decline in enrollment in baccalaureate nursing programs continues for the fifth year in a row."

Pedersen believes it's important for young people to learn from experienced professionals about the rewards of nursing. For that reason, SUNAA's main focus is to establish mentoring relationships between nursing students and professional nurses, to help students learn about nursing as a career and to guide new graduates just starting out.

About 50 nursing alumni already have expressed an interest in becoming mentors. Many students will have an opportunity to select their own mentors at a series of alumni get-togethers. Some students will select a mentor based on geographic location, while others will base their selection on a nursing specialty, such as pediatric oncology or gerontology. CELEBRATE NATIONAL ORANGE DAY

March 24 was the official date of Syracuse University's founding in 1870. On March 24, 1994, alumni from across the country displayed their orange pride en masse for the first time. Now National Orange Day is an annual celebration that allows SU students and alumni to join together to show their orange spirit.

The Office of Alumni Relations invites you to be a part of National Orange Day by participating in an event that focuses on community service. Such events might include:

- Collecting food for food banks and pantries.
- Coordinating a clothing drive for the homeless.
- Volunteering at a hospital or nursing home.
- Mentoring a student at a local school.
- Organizing a blood drive.

Whatever you do, be sure to wear something orange on March 24—a sweater, a tie, a ribbon on your lapel, or just carry an orange to show your SU pride.

THE YEAR TO VOLUNTEER

Since 1997, the Syracuse University Central New Jersey Alumni Club has marked National Orange Day by volunteering at the Menlo Park Veteran's Home in Edison, New Jersey, and at Elijah's Kitchen in New Brunswick, New Jersey. "We may not always volunteer on March 24th," says club president Lou Yannaco '67,

"but we always plan a community service activity in mid-March in honor of National Orange Day to show our loyalty to SU."

Until recently most of the participants in the club's community service projects were either officers or board members. At the dawn of the new millennium, the board of directors wants club members to take a more active role in volunteer projects as well. To focus the club's efforts on community service during the "Year to Volunteer," board member Andy Baumbach '84 was appointed program chairman of community service. "Our goal

for the year 2000-01 is to perform one act of community service every month," says Baumbach. "If just 50 percent of our members volunteer two to three hours of their time once a year, we can achieve our goal."

Yannaco says the group plans to continue helping out at Elijah's Kitchen and to undertake a project with Habitat for Humanity in early 2001. He says the club is always looking for new nonprofit organizations to help throughout Central New Jersey.

If you would like to become a member

of the club, are already a member and would like to volunteer, or know of an organization in your area that could use some help, contact Baumbach at 732-422-2742, Yannaco at 732-251-1403, or e-mail lyannaco@panynj.gov. Alumni can also indicate their interest in volunteering on the club membership renewal form that was mailed to all Central New Jersey alumni.

andrew Petkun, 70

Photojournalist Andrew Petkun witnessed first-hand the horror of the AIDS epidemic in Africa. He captured the face of the AIDS crisis on film and now hopes his photographs will inspire humanitarian relief. "This is a plague of unprecedented proportions that will wipe out a sizable number of African people," Petkun says. "It's a remarkably devastating, extraordinarily sad situation."

During three trips to the African continent in the past year as part of a collaborative AIDS photo-essay project, Petkun photographed people in Tanzania, Ethiopia, South Africa, and Botswana, all of whom are either infected with the HIV virus, or will lose family members to what has been called the modern-day equivalent of the bubonic plague. In sub-Saharan Africa, 24.5 million adults and children live with HIV/AIDS. More than 12 million African children have been orphaned because of the disease, which has claimed more than 2 million lives.

Petkun became interested in the project through his friend, Charles Stith, U.S. ambassador to Tanzania. Stith's wife, Deborah

Prothrow-Stith, an associate dean at the Harvard School of Public Health, collaborated with Petkun on the AIDS photo essay.

Last November, Petkun was the only photographer to speak at the First International Conference on AIDS in Ethiopia, attended by doctors and other health care professionals, government and religious leaders, AIDS activists, and academicians. "Everyone was talking about statistics," Petkun says. "Then I showed photographs of people with AIDS, which was very powerful. It's been said that statistics are merely human beings with the tears removed. My aim is to try to put the emotion back in, so people can respond to it."

Petkun—who has exhibited his photos at the Birmingham (Alabama) Civil Rights Institute and, most recently, at World Bank headquarters in Washington, D.C., in connection with World AIDS Day—hopes his work will help people realize the scope of the disaster. "It's difficult to understand this virus and what it has done in Africa," he says. "It's difficult to understand the complexity, the enormity of the virus. Seeing people's faces has a way of driving that home."

—Paula Meseroll

Andrew Petkun hopes to increase awareness of the AIDS epidemic in Africa through his photographs of people affected by the deadly disease.

Rob Edwards '85

By the time he had graduated from the College of Visual and Performing Arts film program, Rob Edwards was already a professional writer.

Edwards began networking as a sophomore, when he wrote a humorous condolence note to a producer of the television series *M*A*S*H* on the show's cancellation. In further correspondence, he received good advice: read the classics, move to California, and learn to write jokes.

The following summer, Edwards answered a trade ad for a joke writer. "After finals I went to Los Angeles, camped out on a friend's floor, and wrote jokes for stand-up comics," he says. "I also met a lot of people."

After graduating, he delivered office supplies at MTM Productions by day and furiously churned out spec scripts at night. When he had a good one, he made 80 copies, put them in bright yellow folders, and handed them out at MTM along with the paper clips. "People began talking about me at lunch, and by the end of the day I had two job offers and agents were calling," he says.

Edwards was on the move; he was hired to write for such series as the *New Love American Style*, *Better Days*, *Full House*, and *A Different World* before ending up with *In Living Color* and then *The Fresh Prince of Bel-Air*.

Two years ago he left TV to write screenplays. "My first script, an action picture, took a year to write but just one day to sell," says Edwards, who's currently writing an animated feature for Disney.

Edwards wants to direct, but feels he should focus on writing awhile longer. "Your writing can suffer if you jump into directing too soon," he says. "The people I respect wrote at least three screenplays before directing."

He admits that he's sometimes a little too hard on himself. "I rarely hand in a first draft," he says. "I do a lot of research and when I finish, there's nothing left inside me that's not on the page. If I have an edge, that's it."

arielle Tepper '94

arielle Tepper wasted little time after college turning her love for the stage into a successful career as one of the busiest theater producers in New York City. "I'm amazed at how quickly everything happened," says Tepper, a graduate of the College of Visual and Performing Arts. "I certainly didn't expect it."

In six short years, Tepper has experienced the highs and lows of the New York City theater scene. Her production of John Leguizamo's *Freak* earned two Tony nominations in 1997 and James Joyce's *The Dead* earned five last year, while the off-Broadway adaptation of *Trainspotting* in 1998 closed soon after opening. Tepper also has ventured into the world of film, producing the recently released *30 Days*.

Although Tepper rapidly established herself as one of New York's most talented young producers, she knows her success is the culmination of long hours of hard work and single-minded determination. "Many people come out of the drama program wanting to act or direct," she says. "I've known I wanted to be a producer since I was 18."

Tepper studied lighting design in the SU

drama department and spent summers in the New York and London theater districts, making contacts and learning the ropes. After graduation, she launched her career working at a spare desk in her father's office.

While Tepper calls her own shots these days, she hasn't forgotten her days as a drama student. Last spring she organized a six-day field experience for 20 drama seniors. The students met with writers, actors, and directors,

and soaked up Broadway vibes. "I wanted the students to have a real New York experience," Tepper says. "It's something I wish had been available to me when I was at SU."

Tepper plans a similar opportunity for seniors this year. "Students want to hear the truth about people who have achieved success," she says. "They want to talk with people who are working in different aspects of the theater."

Tepper was named an SU trustee last November, a responsibility in which she takes great pride. "I learned a lot in the four years I spent at Syracuse," she says. "I'm happy to be able to give something back."

Lucia Perillo G'86

When poet Lucia Perillo G'86 learned she had won a \$500,000 "genius award" from the John D. and Catherine T. MacArthur Foundation, she was almost too preoccupied to realize the magnitude of her achievement. "I was in the middle of moving and all I could think of were the complications," says Perillo, an associate professor of English at Southern Illinois University Carbondale (SIUC). "I weathered the move and, of course, I am now terribly and guiltily grateful."

Perillo, the author of three poetry collections, came to Syracuse in 1984 to pursue a master's degree in English/creative writing, leaving behind a successful career as a naturalist with the U.S. Fish and Wildlife Service. That work, she says, has only recently begun to surface in her writing. "I was more interested in cultural commentary," Perillo recalls. "Now that I have aged and mellowed, I'm much less interested in serial killers and more interested in birds."

At SU, Perillo was influenced by some of the University's most celebrated writing pro-

fessors, including Hayden Carruth and Stephen Dobyns. "Before SU, I was half-heartedly committed to writing, and those guys exemplified for me the whole heart," Perillo says. "I was also profoundly influenced by my classmates; to this day we are still beloved friends."

For the past decade, Perillo, who is married to Jim Rudy '86, has juggled writing with her teaching duties at SIUC. The MacArthur award enables her to spend more time writing. "I won't be teaching in the immediate future," she says. "I try to involve my

students in my writing processes, but I suspect they are bored by my example and instead want to model themselves on someone more cool—like Jack Kerouac."

The award may give Perillo a chance to write about one of her favorite aspects of Central New York—the weather. "I spent many winter midnights walking in Thornden Park," she recalls. "The crispness and lilac color of the snow are still vivid." —Tammy DiDomenico
